

5 Alerts That Will Make Bill Payer *Work Smarter for You*

Bill Payer alerts can be set up for e-mail and text messaging notifications, or both.

- 1- **Transaction Over a Specified Dollar Amount.** This alert can be set up for any number of payees, from all of them to just one. For example, set up an alert for any transaction over \$50 to any payee, or just for a transaction over \$25 to ABC Company.
- 2- **Message Center.** Receive an alert any time you receive a new message in Bill Payer.
- 3- **Recurring Transaction.** If you have recurring payments set up (same amount to the same company on a regular schedule), receive an alert once the transaction has been processed. For example, set up a monthly payment of \$50 to your health club, receive an alert once the money has been sent.
- 4- **Transfer Account Is Approved.** Receive an alert when a transfer account you set up has been approved.
- 5- **Pay from Account Is Approved.** Receive an alert when an additional account you set up to make payments from, such as a secondary checking account, gets approved.
